WHAT TOOLS DO YOU USE AND WHY? WHAT IS YOUR HISTORY?

From the editor

Summer is in full swing, and we hope these magical months are filled with joy and self discovery.

Interconnectedness is also a big theme as the Sun moves through Cancer, and we're profiling the one Cancerian who embodies interconnectedness like no one else. Kevin Bacon is connected to the world—but how exactly, and what does it mean? To answer these questions, we look the psychic traits behind his influential career.

Another great thing about Summer is going to the movies. It so happens that several of this Summer's box office openings have strong psychic themes! We break them down for you in our Psychic Summer Movie guide.

And after the long day has finally given way to starry Summer nights, what are your dreams telling you? We look at the symbolism of Summer dreams and what they say about your spiritual journey.

Finally, our featured reader this month is Dianne, a multi-talented psychic who uses a combination of powerful techniques to achieve a clear, direct connection. Her clients are raving about it!

We hope you'll stay in touch during the height of the Summer magic. We're the most respected psychic service in the UK because of you, so thank you!

Love and Light,

WHEN DID YOU FIRST DISCOVER THAT YOU WERE PSYCHIC?

I first discovered I was psychic aged 14 when I began to have dreams that predicted the future. Sometimes they scared me, but eventually I learnt to write down my dreams and put them to good use.

WHAT ARE YOUR TALENTS AND WHAT DO THEY MEAN?

Clairvoyance is the ability to see pictures either symbolically or literally in my mind as you would in dream state. It's that sense of knowing that you can't explain. Clairaudience is information that you hear in the form of actual words or thoughts. Tie these together, and they help to give you a perfect picture to help someone! Mediumship is different, in that you are connecting, rather like a translator, to someone in the spirit world and feeding back the information to give evidence of the spirit's survival after physical death.

Sometimes I don't use any tools. Sometimes I use colour cards if someone wants more of a soul reading. Other times I use the angel cards to give guidance. In some cases, angel cards give more accuracy then, say, tuning into someone directly when they are in a distraught state. In that situation, it's better to use the cards and avoid feeding back fears that might come through telepathically.

ONE REMARKABLE STORY FROM A RECENT CLIENT?

When Jane was trapped in a desperately unhappy relationship, she had a love reading with me. I told her that her marriage was unhealthy, but then I suddenly said, "what's his mother got to do with this?" Jane was shocked and said "My partner is a real mummy's boy and will never defend me when she criticises the way I run the house or look after our daughter." I felt strongly that the couple were more like strangers, never speaking or sleeping in the same bed. I knew she was at a crossroads in her life, and that if she was brave enough to let go of the relationship, she would find love with someone through work who was completely different, and with whom she would be best friends. I heard from Jane again several months later and she sounded bubbly and excited—like a different woman. She had felt positive enough to end the relationship and soon after spent more time with a man from work. He was the complete opposite to her ex in that he wasn't interested in money or possessions and was kind and thoughtful. She looked at him and remembered my words. She told me in a burst of excitement that if she hadn't come to me, she would still be stuck in an unhappy relationship, thinking nothing better would come along. She just needed an inspirational push in the right direction, which the psychic reading gave her.

SIX DEGREES

☿ 狗

The six degrees of Kevin Bacon is a parlour game in which Bacon is connected to any other actor in six films or less.

For instance, you could challenge your opponent by saying “Judi Dench.” Your opponent could then say, “Judi Dench was in *Hamlet* with Jack Lemmon who was in *JFK* with Kevin Bacon.”

It may have started out as a fun thing to do on long car rides, but it’s become more than that. Mobile phone networks have hired Bacon as a spokesperson for their networks. Mathematicians have conducted experiments on what they call “the Bacon number,” and Google has even built this number into its search algorithms. Search the name of any actor followed by “Bacon number” and the Google itself will tell you exactly how that actor is linked to Bacon, and by how many degrees!

So why is it that Kevin Bacon has become an enduring symbol of humanity’s interconnectedness? What can his astrological signs tell us about his life and career?

Kevin Norwood Bacon was born 8th July, 1958, making him a Cancer born in the Chinese Year of the Dog. These two signs give an immediate impression of caring and loyalty, the two traits most commonly associated to Cancer and Dog, yet Bacon’s early life seems better characterized by other psychic powers. He left his hometown of Philadelphia at the

age of 17 to pursue an acting career in New York, and later acknowledged the brazenness of his attitude and the significant size of his ego at this time. He wanted success, and he wanted it now. This is a reflection of his Moon and Mars in Aries, which thrive on decisive action, as well as Mercury in Leo which loves to speak and shine in front of an audience.

Without these traits, the actor we know so well may never have broken through. As it is, he quickly began to make a name for himself in both film and theater, striving to perfect his craft as a serious actor. Starring roles in *Friday the 13th* and *Diner* gave his resumé a boost, but it wasn’t until 1984’s *Footloose* that he exploded into the public eye. His character, Ren McCormack, manages to unite a polarised small town through the power of dance. His appeal on the dance floor was aided by his Mercury in Leo, no doubt, as well as Venus in the breezy, flirty sign of Gemini.

But underneath all the drive, ambition and ego, Kevin Bacon has a soft and sensitive side. This is thanks to his main astrological signs, Cancer and Dog, which give his demeanor a disarming quality and a captivating, complex screen presence. Cancer is among the most sensitive and psychic signs of the Western zodiac, while Dog is often reserved and emotionally cryptic. This mix of traits gives Bacon a deep reserve of qualities to draw upon for his roles.

As his resumé continued to grow, Bacon found his way into several films with sprawling, ensemble casts. These include *Flatliners* (Julie Roberts, Keifer Sutherland), *JFK* (Kevin Costner, Gary Oldman, Tommy Lee Jones), *A Few Good Men* (Tom Cruise, Jack Nicholson, Demi Moore), *Apollo 13* (Tom Hanks, Bill Paxton, Gary Sinise, Ed Harris), *Sleepers* (Robert DeNiro, Dustin Hoffman, Brad Pitt, Minnie Driver), and several others.

These roles are what made him a symbol of connectivity between actors, and by extension, all human beings, but it wasn’t just by chance. Bacon’s relentless work ethic, springing from his Dog nature, as well as his Mars and Moon in Aries, has given him a deep filmography of feature films spanning nearly 40 years. His versatility, fueled by his deep Cancerian emotion as well as elements like Venus in tricky Gemini and Mercury in brazen Leo, has made him a favorite for quirky supporting roles; and he rarely works with the same director twice.

With a name that becomes more synonymous with human connection every day, a charitable foundation (sixdegrees.org), and a film career that won’t quit (he stars in the forthcoming *Black Mass* alongside Johnny Depp), Kevin Bacon is one actor that history, and perhaps even science, is unlikely to forget.

Horoscopes

July 2015

Check out today's horoscopes at crystalclearpsychics.co.uk/horoscopes.html

Aries

You are likely to be busy on the home front, perhaps with decluttering, DIY or hosting guests. The New Moon in Cancer on July 15th also brings an opportunity to understand your own needs more, especially through insightful conversations. The last ten days sees your pleasure zone lit up, and you can dazzle people with your charismatic approach.

Cancer

Well, you can certainly be in your element this month. This can see you keen to get ahead with personal plans and share your talents with the wider world. However, it will pay not to rock the boat too much mid-month, when Mercury clashes with the impatient Uranus. Later in the month your focus can switch to your resources, but do fend off any impulsive urges.

Taurus

Communication, always so important, really comes to the fore in the weeks ahead, with a chance to make real progress by connecting with the right people. However, avoid complex negotiations at the mid-month mark as someone's feisty mood can scupper even the best-laid of plans. When Venus rewinds from July 25th, you can think again about someone in a romantic context.

Leo

With the Sun journeying through Cancer early in the month, consider your priorities and let go of situations that seem to be naturally winding down. Doing so will leave room for new opportunities. Once the Sun blazes into your sign on July 22nd, along with Mercury on the 24th, you'll notice an increase in your vitality and a chance to dazzle people, one that can really enhance your progress.

Gemini

Money matters gain in importance, with the option to make some canny decisions that may well improve your situation. And, while the New Moon on July 15th can be perfect for fresh starts, delay new initiatives for a few days if you need time to forge an agreement. The last phase of July can see ideas flow with some promising opportunities on the astral cards.

Virgo

You're likely to be motivated to network and expand your circle of friends, which could prove very rewarding as you welcome new people into the fold. Even so, mid month someone else could prove rather jealous or irrational. From week three the focus does however shift, encouraging you to find respite, relax and recharge. If you feel like a makeover, why not go for it?

Libra

Friends can seem very supportive, with your social life upbeat and lively over the weeks ahead. Despite this, goals that are more meaningful can also take on greater importance. The New Moon mid-month can help to showcase your talents, but someone could still surprise you by being unreasonable. The last third of July might see you in the mood to join a group with mutually respected hopes.

Capricorn

The Full Moon on July 1st can bring feelings to the surface regarding a key relationship. Furthermore, the mid-month New Moon can be equally volatile, making a sensitive approach to others essential to keep things on an even keel. Fortunately, your finances can be blessed with a small windfall or someone's act of generosity, as the month comes to a close.

Scorpio

Though busy, you're probably going to be keen to expand your horizons, travel or perhaps to embrace higher education. Knowledge, and especially new information, can propel you into a totally different sphere, one that might represent a completely fresh new start in life. Mind, from July 22nd and 24th, your thinking can become more goal orientated. Whatever ambitions are important to you are sure to come more sharply into focus, Scorpio.

Aquarius

Relationships, whether business or romance orientated, continue to look positive for the entire month. You can also be hot on the trail of a new job or lifestyle opportunities that could make a truly positive difference. From July 22nd and 24th, your talent for co-operating with very different types of people can flourish as might the potential for romantic options to sizzle!

Sagittarius

Thoughts can run deep with Saturn reversing backwards into Scorpio once more and with the element of water in focus. Talking things over with a gentle and caring individual may well help. Even so, shared finances can be another topic that needs addressing, perhaps even with some urgency. However, as July winds down your love of travel can bite, urging you to explore or expand your mind.

Pisces

This can be a month to revel in pleasure options and creative pastimes, as a big focus on your fun sector urges you to go and enjoy yourself. Despite this, a degree of patience may be needed mid-month when a very restless set of influences can spring all sorts of challenges. However, job and lifestyle improvements are possible in the last ten days of July, if you can show the necessary self-discipline.

PSYCHIC MOVIE GUIDE

Alternate worlds, special powers, premonitions and magic charms all play starring roles in this year's crop of Summer movies. From blockbusters to arthouse films, we break down the most psychic movies of the Summer for you. Which ones will you see, and how do their plots compare to real life psychic phenomena?

TOMORROWLAND

This multi-dimensional thriller is one of the most interesting psychic movies of the year. George Clooney leads a young girl, played by Britt Robertson, on a journey to another dimension where events unfold, directly affecting the fate of earth. This other dimension is a place where science, creativity and spirituality once thrived, but are now under attack by oppressive forces. A sprawling, riveting interplay between two interconnecting realities—hold on to your hats!

POLTERGEIST

For anyone who has seen the 1982 original, this re-make needs no introduction. A young family moves into a new home, only to discover the presence of a terrifying spiritual force. Sam Rockwell stars in this tale about the dark side of spiritual phenomena. The one thing to remember about this film is, it's strictly entertainment! With top notch special effects and a wide 3-D release, *Poltergeist* is a quintessential Summer popcorn movie.

INSIDE OUT

What if instead of characters in a movie having emotions and psychic vibrations, characters in a movie were emotions and psychic vibrations? This is the premise for Pixar's promising new animated feature starring Diane Lane. A young girl, Riley, is forced to leave her hometown when her father finds a job in the city. The emotions that live inside Riley—Joy, Fear, Disgust, Anger and Sadness—must embark on a heartwarming journey through the colourful landscapes of her mind in order to find happiness and balance in a new environment.

SELF/LESS

This sci-fi thriller, starring Sir Ben Kingsley alongside heartthrob Ryan Reynolds, explores the connection between mind, body and spirit like few films have before. When a wealthy man (Kingsley) is diagnosed with terminal cancer, he volunteers for a radical procedure that could transfer his consciousness into the body of a healthy young man. The experiment goes awry, of course—but as the younger man's consciousness fights to resurface, the film makes some interesting explorations of dreams, psychic experiences, and the meaning of spiritual identity.

THAT'S NOT ALL!

This is a particularly psychic Summer at the movies. Also look out for *Minions*, another animated film about little spiritual beings who alter the course of human history; *Fantastic Four*, the latest offering from Marvel, features alternate universes and psychic powers galore; and don't forget the surprise sequel to the beloved spiritual martial arts film, *Crouching Tiger, Hidden Dragon!*

SUMMER DREAMS AND WHAT THEY MEAN

For many of us, Summer is the season of seasons. It's synonymous with joy, light, happiness—a time of spiritual growth and expansion. Dreams in particular can be a fertile source of personal development during these months. By looking at some of the traditional symbols of Summer, and examining their significance in dreams, we can get even closer to the true psychic nature of this amazing season. There are many symbols of Summer that can appear in your dreams.—these are just a few. We hope your dreams are rich and rewarding this Summer, allowing this transformative season bestow its unique wisdom on a deep, psychic level!

When the rays of the Sun or flames of a fire come prominently into your sleep, your psyche is tuning into the universal energies of creativity, passion, clarity and youth. Spirit is telling you to embody these energies in your life. It's never too late to be fresh, young, and full of possibility!

Dreams involving sand can have a number of meanings, but are commonly related to time. Like the ocean, beaches and sand teach us of the fleeting nature of time, and the enduring spiritual nature hidden beneath it. Building a sandcastle in your dreams may mean that you're putting too much emphasis on worldly accomplishments, and could use more of life's simple joys.

To dream of waterfalls often tells you there is a need to let the past go, so that new life can flow through you. You may also be feeling overwhelmed by emotional energies. Dreaming of oceans or seas gives you the power of vast perspectives and an endless capacity for renewal. These bodies of water is powerful, independent, and without limits.

Salamanders are symbols of fire and rebirth, especially for their ability to regrow missing legs and toes. Eagles are associated by Native American tribes with solar energy and decisive action. Lions are another animal of the sun, exuding confidence and superiority with every step. Dreams involving any of these animals bear a powerful Summer message of faith, determination, and positive thinking.
